Climate Certificate

WIND energy + CLIMATE actions

S. Sørensen I/S

has converted 100% of its electricity purchase to renewable energy produced by Danish wind power in the period

from 01.01.2022

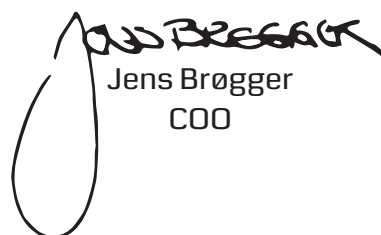

to 31.12.2027

At the same time, direct investment is being made to further reduce the world's CO2 emissions through one or more climate actions in 2022-2027

During this period, the total CO2 emissions are reduced twice: through WIND energy + one or more climate actions in different parts of the world.
